CircuitPython driver for common low-cost FocalTech capacitive touch chips. Currently supports FT6206 & FT6236

# CHAPTER 1

---

## Dependencies

---

This driver depends on:

- Adafruit CircuitPython
- Bus Device

Please ensure all dependencies are available on the CircuitPython filesystem. This is easily achieved by downloading the [Adafruit library and driver bundle](#).

# CHAPTER 2

---

## Usage Example

---

```
import time
import busio
import board
import adafruit_focaltouch

# Create library object using our Bus I2C port
i2c = busio.I2C(board.SCL, board.SDA)

ft = adafruit_focaltouch.Adafruit_FT6XXX(i2c, debug=True)

while True:
    n = ft.touched
    if n:
        print(ft.touches)
```

# CHAPTER 3

---

## API Reference

---

### 3.1 adafruit\_focaltouch

TODO(description)

- Author(s): ladyada

**class** adafruit\_focaltouch.**Adafruit\_FocalTouch**(*i2c*, *address*=56, *debug*=False)  
A driver for the FocalTech capacitive touch sensor.

#### **touched**

Returns the number of touches currently detected

#### **touches**

Returns a list of touchpoint dicts, with ‘x’ and ‘y’ containing the touch coordinates, and ‘id’ as the touch # for multitouch tracking

# CHAPTER 4

---

## Contributing

---

Contributions are welcome! Please read our [Code of Conduct](#) before contributing to help this project stay welcoming.

# CHAPTER 5

---

## Building locally

---

To build this library locally you'll need to install the `circuitpython-build-tools` package.

```
python3 -m venv .env
source .env/bin/activate
pip install circuitpython-build-tools
```

Once installed, make sure you are in the virtual environment:

```
source .env/bin/activate
```

Then run the build:

```
circuitpython-build-bundles --filename_prefix adafruit-circuitpython-focaltouch --
˓→library_location .
```

---
